

NDT (Non-Destructive Testing)

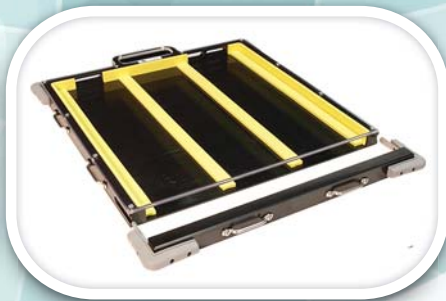

Using an expensive DR Panel in a portable / mobile environment can be extremely risky. You can easily reduce that burden by protecting your investment with one of our innovative NDT Panel Protectors. This product is perfect for field use in harsh environments such as Bridges, Pipelines, Ships, Refineries and Home Land Security.

Non-Destructive Testing

Quality features:

- Complete encasement for extreme environmental conditions
- Balanced lifting strap loops to aid in positioning / alignment
- Clear polycarbonate tube side allowing for image area visibility

Durable Construction:

- PoronXrd foam to absorb impact
- Stainless steel hardware and non-corrosive material
- High impact rubber corners

Custom Options:

- Custom utility openings
- Battery accessibility
- End cap removal allowing for profile imaging
- Optional carbon fiber tube side cover adding weight bearing protection
