

9' RoofGuard Rooftop Guardrail Kit

FACTORY SUPPLY INC.
3412 49th Street North
Saint Petersburg, FL 33710

Leading Edge

This rooftop guardrail system provides 9 feet of leading edge fall protection, requires no rooftop penetration, and can be categorized as a passive fall protection solution.

Eliminate Active Fall Protection Equipment

With the addition of this fall protection system you will be able to eliminate the need for active fall protection equipment such as Safety Harnesses/ Lanyards, Roof Anchor Systems or Horizontal Lifelines. Meaning you will not have to worry about any fines for compliance violations from having inadequate or non-existent rooftop safety training or products.

Storage

These systems come pre-engineered in a singular crate; most parts are pre-assembled with simple to follow instructions and a singular tool for installation.

Usage

This fall protection system is ideal for providing a reliable fall safety device around HVAC, Vents, near Access Ladders, Antennas, Valves, Solar Panels, or simply near frequently travelled areas that require routine maintenance.

Free-Standing

Our free-standing, portable, modular systems are constructed with corrosion resistant, lightweight aluminum tubing and utilize counter weighted baseplates, no roof penetration is required meaning your roof remains intact.
